1. Introduction

- House marketplace is a location where people can regularly gather for the purchase and sale of Flats.
- It is a property portal which deals with every aspect of the consumers' needs in the real estate industry.
- One stop solution for Residential properties for rent, buy, sell without Brokerage.
- House marketplace app is a Revolutionary Tech Platform that helps you Sell or Rent your property quickly, easily and more securely.

2. Objectives

- To provide information about real estate like residential houses for rent and sale.
- To provide a platform where user can buy and rent house in one application.
- To provide platform that offers end-to-end one-stop solution for property seekers.

3. Scope

- The user will be able to use search bar functionality to get information.
- Filter for searching the property as per location, pricing, carpet area wise will be added.
- Can be useful to students/employees for finding nearby apartments.
- We will see the entire system more interactive and try to bridge between user and developer.
- One can easily navigate and visit numerous properties digitally in a matter of seconds.

4. Literature Survey

- The site of such has nobroker have main aim of eliminating the middle man in the deal which costs 1/2 months rent as a commision.It provides a vast range of options for the buyers from wide range of locations and helps directing contacting the sellers.
- Sopranzetti explained hedonic approach is one of the most used conventional approaches to the housing market analysis.
- Liao & Wang examined the relationship between the view orientation of an apartment and its property value in the context of the Shanghai housing market.

5. Proposed System

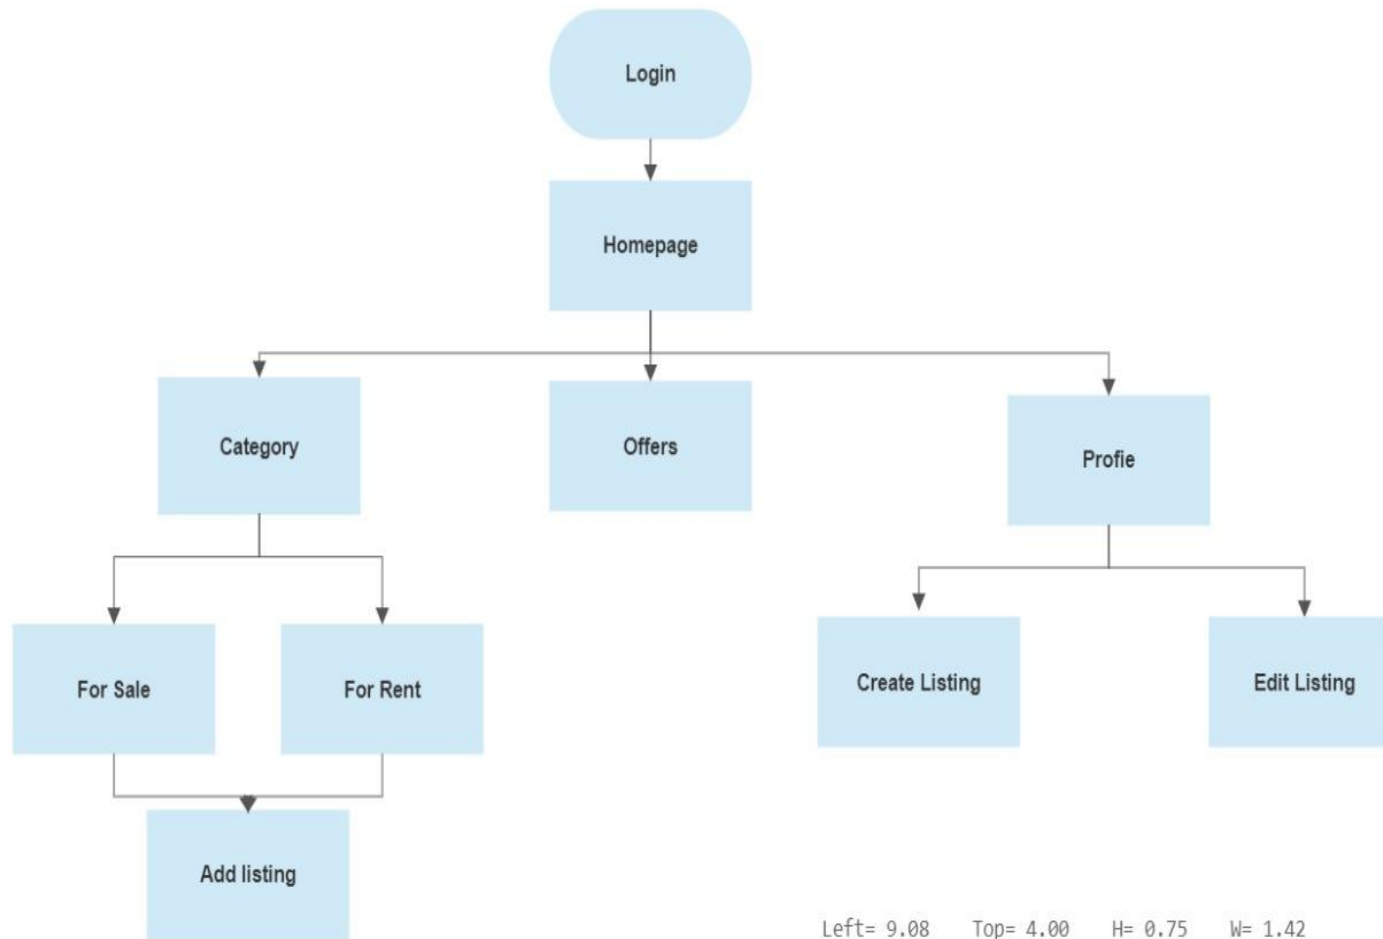

The House Marketplace System is designed in order to eliminate the problem of the current system. This accessibility of the information will be a great advantage as it reduced effort.

- Registration - After filling the required data, the client can register in our proposed system. User will be able to Login into the system with his unique username and password.
- Add Property- Property can only be added by the authenticated users.
- Manage Profile- User can view, update or delete the profile of their own.
- Manage Property- Property management can be done by the user in which the user has a facility to view, edit or delete it.

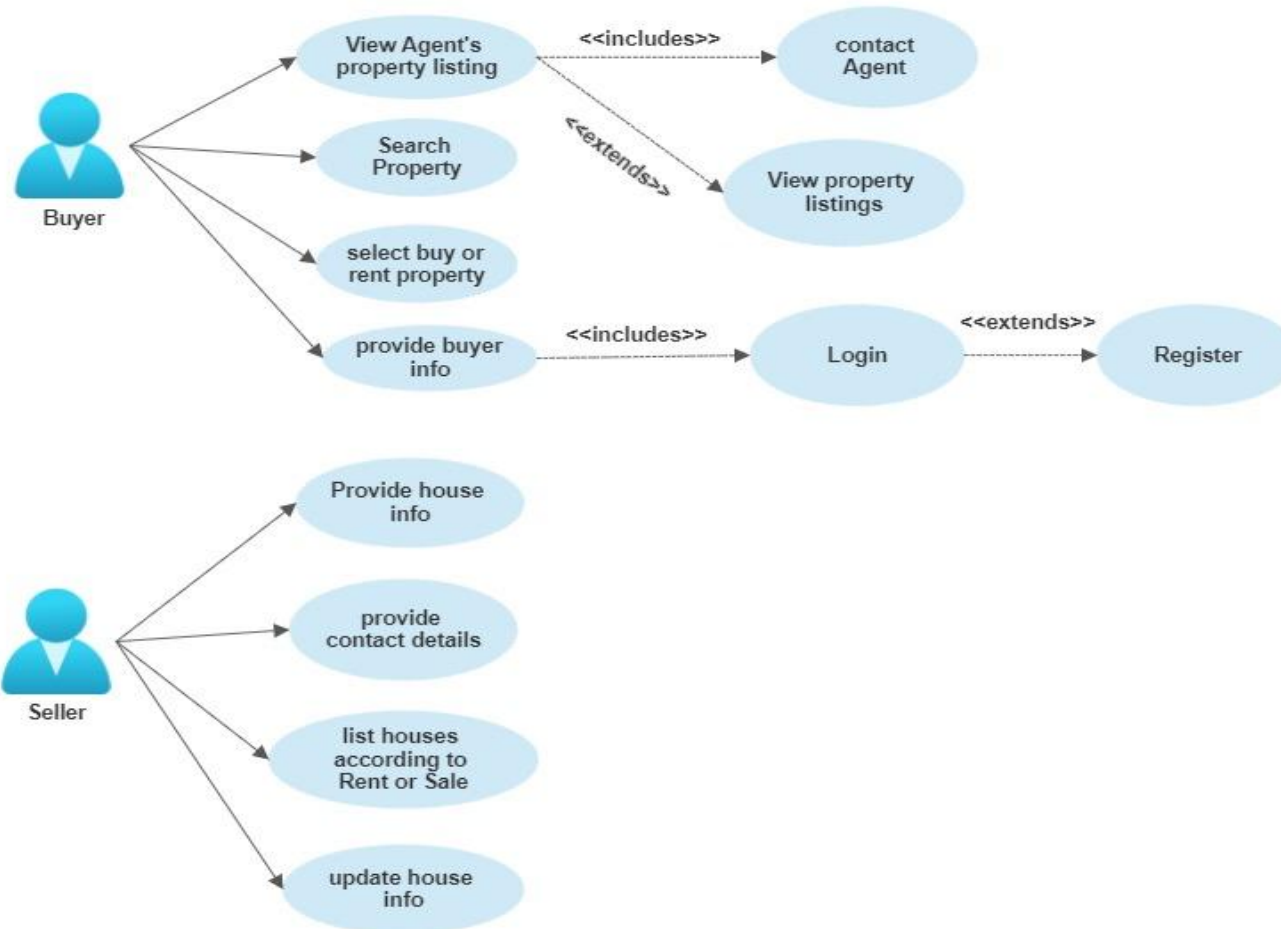

6. Outcome of Project

- User Can Register and Log in.
- User can buy and sale within one interface.
- Buyers can choose between Rental/Sale apartment
- User can choose for near by apartment
- User can choose your house for best offers

7. Block Diagram

8. Use Case/Data Flow Diagram

9. Technology Stack

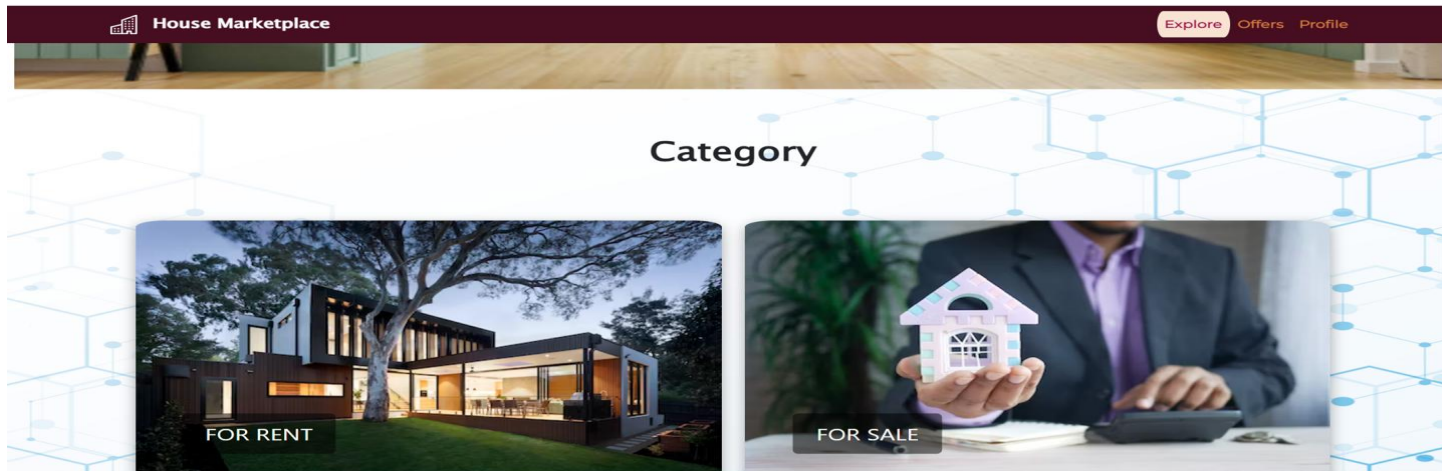

Technology Stack-

- HTML5
- Css3
- React-Js
- Firebase
